PATENT APPLICATION USSN 10/591,198

Attorney Docket No.: VMP-40009

## Amendment to the Claims

A State of

Complete listing of the claims.

## What is claimed is:

- 1. (Currently Amended) Water soluble salt cores manufactured by compacting a mixture of water soluble salts and binder under pressure and by subsequently subjecting said compacted mixture to a thermal treatment, characterized in that the binder is an inorganic phosphate or a mixture of inorganic phosphates with a fraction of between 0.5 and 10 by wt. % of said mixture and between approximately 1 and 10% by weight of a parting agent comprising graphite, the soluble salts are sintered and compressed at approximately 200 degrees C and heating of the salt cores in the thermal treatment is to a temperature under 700 degrees C without being subjected to outgassing.
- 2. (Original) The water soluble salt cores as set forth in claim 1, characterized in that the binder contains a fraction of an inorganic borate.
- 3. (Cancelled) The water soluble cores as set forth in claim 1, characterized in that the mixture contains a fraction of between >0 and 10 wt. % of a parting agent.
- 4. (Previously Presented) The water soluble salt cores as set forth in claim 1, characterized in that the inorganic phosphate is a monoaluminium phosphate.
- 5. (Previously Presented) The water soluble salt cores as set forth in claim 1, characterized in that the inorganic phosphate is a boron phosphate.
- (Previously Presented) The water soluble salt cores as set forth in claim 1, characterized in that the inorganic phosphate is a sodium polyphosphate.
- (Previously Presented) The water soluble salt cores as set forth in claim 1 characterized in that thermal treatment occurs at temperatures of less than 730 °C.
